INDEX TO VOLUME XXXI.

A.

Academy of Nat. Sci. Philadelphia, Proceedings, 1860, 308.
Acclimation, 272.
Agassiz, Louis, Natural History of the United States, 295.
Alloys of copper and zinc, 286.
Alumina and iron, separation from manganese, 113.
separation from lime and magnesia, 112.
America, original documents concerning discovery of, *E. G. Squier*, 60.
American Association for Advancement of Science, 303, 463.
geology, *T. S. Hunt*, 392.
Ammonia picric acid and metallic bases, new combinations of, *M. Carey Lea*, 78.
Appalachian mountain system, *A. Guyot*, 157.
Appleton's New American Cyclopedia, 455.
Arctic explorations, 51.
soundings, *McClintock*, 57.
Arkansas geological survey, 124, 455.
Assiniboine and Saskatchewan exploring expedition, 303.
Asteroids, Titania, Danäe, Erato, 136.
Astronomy and Meteorology, *E. C. Herrick*, 136.
Hindu, translation of Sûrya-Siddhânta, 298.
Atmosphere, general motions and pressure, *W. Ferrel*, 29.
local disturbances, *W. Ferrel*, 38.
Atoll of Ebon in Micronesia, *E. T. Doane*, 318.
Atomic weights of the elements, *W. Gibbs*, 246.
Aurora, an electric discharge modified by earth's magnetism, *B. V. Marsh*, 311.

B.

Bache, A. D., declinometer observations at Girard College, 197.
discussion of influence of the moon on declination of magnetic needle, 98.
Barrande, J., on Primordial fauna and Taconic system, 212.
Bibliography, *J. Nicklès*, 155, 275.
Binocular microscope, Wenham's, 110.
vision and the estimation of distance, 109.
Biological department of Acad. Nat. Sci. Philad., 1860, 309.
Blood-corpuscles seen moving in the retina, *L. Reuben*, 325.
Book notices, 142, 304, 450.
Books received, 304.
Boston Soc. Nat. Hist. Proceedings, 156, 310.
Botanical and Palæontological Report on the geological State survey of Arkansas, *L. Lesquereux*, 431.
necrology for 1860, *A. Gray*, 461.
Society of Canada, 303.
Botany—
Additions to flora of Wisconsin, *T. J. Hale*, 130.
A second century of ferns, *W. J. Hooker*, 132.
Caricography, by *C. Dewey*, 23.
Catalogue of flowering plants and ferns of Ohio, *J. S. Newberry*, 130.
of plants found in New Bedford, Mass., *E. W. Hervey*, 130.
of the phænogamous and filicoid plants of New Castle Co., Delaware, *Edward Tatnall*, 130.
Filices Horti Botanici Lipsiensis, *G. Mettenius*, 134.
Wrightianæ et Fendlerianæ, etc., *D. C. Eaton*, 130.
Flora Capensis, or plants of Cape Colony, Caffraria and Port Natal, *Harvey* and *Sonder*, 128.
of the British West India Islands, *A. H. R. Grisebach*, 129.
Fungi Caroliniani Exsiccati, *H. W. Ravenel*, 130.
Local botanical catalogues, 130.
Multiplicity of embryos and germination of Cælebogyne, *A. Braun*, 131.
Plantæ Wrightianæ e Cuba Orientali, a *A. Grisebach*, 129.
Proceedings of the Linnæan Society 1860, contents and notes, *Asa Gray*, 443.
South African flora, Thesaurus Capensis, 128.
Species Filicum: descriptions of all known ferns, *W. J. Hooker*, 132.
Uber einige Farngattungen, *G. Mettenius*, 133.
Uber Polyembryonie und Reimung von Cælebogyne, *A. Braun*, 131.
Bradley, F., shooting stars at Chicago, Aug. 1860, 136.

Bradley, F. H., trilobites of Wisconsin 'Potsdam,' 294.
Braun, A., multiplicity of embryos and germination of Cælebogyne, 131.
Bree, C. R., species not transmutable, review of Darwin's book, 449.
Brush, Geo. J., Ninth Supplement to Dana's Mineralogy, 354.
note on Tissier's process for iron, 130.
Bunsen, a new alkaline metal, 105.

C.

California geological survey, 124.
Canada, botanical society of, 303.
geological survey, 122.
Canadian Naturalist and Geologist, 310.
Caricography, by *C. Dewey*, 23.
Casseday, S. A., death of, 155.
Central Africa, Heuglin's search for Dr. Vogel, 59.
Chambers' Encyclopedia, 455.
CHEMISTRY—
A new alkaline metal, *Bunsen*, 105.
Alloys of copper and zinc, *F. H. Storer*, 286, 423.
Alumina and iron from manganese, 113.
from lime and magnesia, 112.
Atomic weights of elements, *W. Gibbs*, 246.
Baudrimont's protosulphid of carbon, 281.
Carbonate of soda, action on cast iron, *C. Tissier*, 120.
Chemical analysis of the solar atmosphere, *Kirchhoff*, 103.
synthesis, 270.
Chlorous acid, density of vapor, 277.
Cleansing mordanted cloth before dyeing, *J. Loewenthal*, 117.
Coal, petroleum, and other distilled oils, *A. Gesner*, 147.
Compound of boron with ethyl, 276.
Cooke's Chemical Physics, 149.
Cyanid of ethylene, 422.
Fusel oil, test for, *W. Stein*, 114.
Hydrocarbons, C_nH_2, in coal gas, *F. H. Storer*, 118.
Incineration of filters, *F. H. Storer*, 118.
Lead in some silver coins, 430.
Manganese from magnesia and lime, 113.
Manufacture of vinegar by the quick process, *C. M. Wetherill*, 450.
Mutual relations of equivalents, *J. S. Stas*, 419.
New combinations of ammonia, picric acid and metallic bases, *M. Carey Lea*, 78.
New lead-salt corresponding to cobalt yellow, *S. D. Hayes*, 226.
Oleflant gas transformed into organic acids, 278.
Oxyd of ethylene, 277.
Oxyd of iron from lime and magnesia, 113.
Oxyd of lead, preparation free from copper and iron, *Th. Wichmann*, 116.
Oxygen, preparation of, 280, 427.
CHEMISTRY.—
Phosphoric acid, Chancel's method of estimating, *S. W. Johnson*, 281.
Phosphoric acid, determination of, 279.
Picramic acid, *M. C. Lea*, 188.
Picric acid a test for potash, sources of error, *M. Carey Lea*, 75.
Pig-iron containing copper cannot be puddled, *C. List*, 115.
Polyatomic bases of the nitrogen, phosphorus and arsenic series, *A. W. Hoffmann*, 420.
Polyethylenic alcohols, 280.
Preparation of oxygen on the great scale, *Deville* and *Debray*, 280, 427.
Products from combustion of gunpowder under different pressures, *R. F. Craig*, 429.
Separation of mono-, bi-, and triethylamin, *Hofmann*, 422.
Soap, value of different kinds, *R. Graeger*, 114.
Strontia distinguished from lime, 113.
Sweet fermentation of milk, *A. Müller*, 428.
Theory of types, *T. S. Hunt*, 256, 460.
Zinc, impurities of commercial, *Elliot* and *Storer*, 142.
Coal, *J. W. Dawson's* papers on structure, 290.
Colors of flames, *Merz*, 105.
Colors produced by absorption or interference, method of mingling, 109.
Comet, new, 136, 463.
Cooke's chemical physics, 149.
Cooke, J. P., Jr., dimorphism of arsenic, antimony and zinc, 191.
Cooper, Dr., reply to Gov. Stevens, 302.
Coulvier-gravier, shooting stars, Paris, Aug. 1860, 137.
Cours de Droit Naturel, *Jouffroy*, 155.
Craig, R. F., products from combustion of gunpowder under different pressures, 429.

D.

Daussy, Pierre, obituary of, 268.
Davy, Capt. C. H., communication in regard to total solar eclipse, July 18, 1860, 139.
Dawson, Prof. J. W., papers on the coal, 290.
Declinometer observations at Girard College, *A. D. Bache*, 197.
Deville and *Debray*, preparation of oxygen on the great scale, 280, 427.
Dewey, C., on caricography, 23.
Dichroscope, *O. N. Rood*, 107.
Dictionary of Universal Knowledge, *Chambers*, 455.
Diffusion of germs, 269.
Dimorphism of arsenic, antimony and zinc, *J. P. Cooke, Jr.*, 191.
Doane, E. T., atoll of Ebon in Micronesia, 318.
Dove's optical studies, 109.
Duméril, obituary notice of, 266.

E.

Earthquake in Canada and Northern U. S., Oct., 1860, 150.
Eaton, Daniel C., Filices Wrightianæ et Fendlerianæ, etc., 130.
Education, intellectual, moral, physical, *H. Spencer*, 304.
Electric light, 110.
Eliot and *Storer*, lead in some silver coins, 430.
Eliot and *Storer*, impurities of commercial zinc, 142.
En Amèrique et in Europe, *Marmier*, 155.
Enault, L., La Norvège, 155.
Espy, J. P., death of, 151.
Eye-piece, Tolles' orthoscopic, 112.

F.

Faraday, on regelation, 414.
Fauna of Quebec group, *W. E. Logan*, 216.
Ferrel, W., motion of fluids and solids relative to the earth's surface, 27.
narrative of Am. expedition to N.W. British America to observe total solar eclipse of July 18, 1860, 139.
Figuier, L'année scientifique et industrielle, 155.
Flames, colors of, *Merz*, 105.
Fossils of Northern New England and Quebec, 210.
Fulgurites or lightning tubes, 302.

G.

Gabb, Wm. M., defends Dr. Moore of Texas survey, 460.
Geographical notices, *D. C. Gilman*, 51.
Arctic explorations; the Hayes expedition, 51; Hall's search for the relics of Franklin's expedition, 54; Capt. Parker Snow's proposal to search for the Franklin relics, 57; McClintock's Arctic soundings, 57; Heuglin's search for Dr. Vogel in Central Africa, 59; Medical statistics of the U. S. Army, 60; Squier's collection of original documents concerning the discovery of America, 60.
Geological survey of Canada, report for 1858, notice of, *T. S. Hunt*, 122.
Geological surveys and reports, Arkansas, 124, 431, 455; California, 124; Canada, 122, 124; Illinois, 124; Kentucky, 294, 460; New York, 125; Tennessee, 294; Texas, 124, 294, 460.
Geology.—
Age of Nebraska leaves, *Prof. Heer's* reply to Dr. Newberry, 435.
American geology, *T. Sterry Hunt*, 392.
Atoll of Ebon in Micronesia, *E. T. Doane*, 318.
Catalogue of fossils found in Nebraska, *Meek* and *Hayden*, 126.
Coal, papers on, by *J. W. Dawson*, noticed, 290.
Cretaceous strata of Texas, *B. F. Shumard*, 127.
Crinoidea and Echinoidea from Carboniferous rocks of Illinois and other Western States, *Meek* and *Worthen*, 125.
Die Silurische Fauna des westlichen Tennessee, *F. Roemer*, 127.
Elongation and parallel arrangement of pebbles in Newport conglomerate, *W. B. Rogers*, 440.
Metamorphism of certain conglomerates into talcose and micaceous schists and gneiss, *E. Hitchcock*, 372.
New carboniferous fossils from Illinois and other Western States, *Meek* and *Worthen*, 125.
Palæontology contributions to, by *James Hall*, 292.
Palæontology in report of Regents of University of N. Y., 292.
Pebbles elongated, 375.
Phosphoric acid in igneous rocks, 353.
Sketch of geology of head waters of Missouri and Yellow Stone rivers, *F. V. Hayden*, 229.
Taconic system and fossils of northern New England and Quebec, 210.
Tracks in Potsdam formation, 17.
Trilobites of Wisconsin Potsdam, 294.
Upheaval of the sea at the Sandwich Islands, 301.
Upper silurian beds of Western Tennessee, and F. Roemer's monograph, by *J. M. Safford*, 205.
Gesner, A., coal petroleum and other distilled oils, 147.
Gibbs, J. W., obituary of, 463.
Gibbs, W., atomic weights of elements, 246.
contributions to chemistry and physics, 103, 276, 414, 419.
analytical chemistry, 112.
researches on platinum metals, 63.
Gilman, D. C., geographical notices, 51.
Graeger, R., value of different kinds of soap, 114.
Gray, A., Botanical notices, 128, 431, 443.
review of Phillips' Life on the Earth, 444.
Bree's book on species, 449.
Grisebach, A. H. R., Flora of the British West India Islands, 129.
Plantæ Wrightianæ e Cuba Orientali, 129.
Guyot, A., Appalachian mountain system, 157.

H.

Hackley, Chas. W., obituary of, 303.
Haeusser, E., obituary of, 461.
Hale, T. J., additions to flora of Wisconsin, 130.
Hall, James, contributions to palæontology, 292.
primordial fauna and Point Levi fossils, 220.
Hall's search for Sir J. Franklin, 54.
Harvey, Wm. H., flora capensis, plants of Cape Colony, 128.
thesaurus capensis or South African flora, 128.
Hayden, F. V., see *Meek* and *Hayden*.

Hayden, F. V., geology of headwaters of Missouri and Yellow Stone rivers, 229.
Hayes's Arctic expedition, 51.
Hayes, S. D., lead-salt corresponding to cobalt yellow, 226.
Heer, O., reply to Dr. Newberry on age of Nebraska leaves, 435.
Herrick, E. C., asteroids, comet, shooting stars, 136.
Hervey, E. W., plants found in New Bedford, Mass., 130.
Heuglin's search for Dr. Vogel in Central Africa, 59.
Hirn, G. A., L'équivalent méchanique de la chaleur, 155.
Hitchcock, E., conversion of certain conglomerates into talcose and micaceous schists and gneiss, by elongation, flattening, and metamorphosis of the pebbles and cement, 372.
Hochstetter, Prof., death of, 461.
Hofmann, A. W., polyatomic bases of the nitrogen, phosphorus and arsenic series, 420.
separation of mono-, bi-, and triethylamin, 422.
Hooker, Sir W. J., a Second Century of Ferns, 132.
Hunt, T. S., on some points in American geology, 392.
chloritoid from Canada, 442.
chrome garnet, 295.
geological survey of Canada, 122.
theory of types in chemistry, 256, 460.

I.

Illinois geological survey, 124.
Inundations, causes of, 275.
Iridium, resolution of ores of, *W. Gibbs*, 64.

J.

Johnson, S. W., Chancel's method of estimating phosphoric acid, 281.
Jouffroy, Cours de Droit Naturel, 155.

K.

Kentucky geological survey, 294, 460.
King, W., loss of light by glass shades, 283.
Kirchhoff, chemical analysis of the solar atmosphere, 103.
Kirkwood, D., November meteors, 1860, 139.
Klotzsch, Dr. J. F., death of, 461.

L.

L'année littéraire et dramatique, *Vappereau*, 155.
musicale, *Scudo*, 155.
scientifique et industrielle, *L. Figuier*, 155.
La Norvège, *L. Enault*, 155.
Lea, M. Carey, estimation of nitrogen, proposed process and acidimetric process for, 189.
formation of picramic acid, 188.
new combinations of ammonia, picric acid, and metallic bases, 78.
picric acid as a test for potash, 75.
LeConte, John E., death of, 303, 462.
LeConte, J., on Silver Spring of Florida, 1.
Lehmann, J. G. C., death of, 461.
Lesquereux, L., botanical and palæontological report on the State geological survey of Arkansas, 431.
Light, loss of, by glass shades, 283.
List, C., pig iron containing copper cannot be puddled, 115.
Loewenthal, J., cleansing mordanted cloth before dyeing, 117.
Logan, W. E., fauna of Quebec rocks, 216.
tracks in Potsdam formation, 17.
Lustre, Brewster's theory, 342.
experiments on Dove's theory, *O. N. Rood*, 339.
production of, in monocular vision, 343.

M.

Magnetic needle, declination of, influenced by the moon, 98.
solar diurnal variation and annual inequality, 197.
Marmier, En Amèrique et in Europe, 155.
Marsh, B. V., aurora an electric discharge modified by the earth's magnetism, 311.
McClintock's Arctic soundings, 57.
McCurdy, H. I., on Chancel's method of estimating phosphoric acid, 281.
Medical statistics of U. S. Army, 60.
Meek and *Hayden*, Catalogue of fossils collected in Nebraska by U. S. exploring expeditions, 126.
Meek and *Worthen*, description of new species of Crinoidea and Echinoidea from the carboniferous rocks of Illinois and other Western States. Also descriptions of new carboniferous fossils from Illinois and Western States, 125.
Merz, colors of flames, 105.
Metallic lustre, *Dove's* theory of, 109, 339.
Metallurgy, researches on platinum metals, *W. Gibbs*, 63.
Metamorphism of conglomerates with gneiss, talcose and micaceous schists, *E. Hitchcock*, 372.
Meteoric collection of C. U. Shepard (catalogue), 456.
Meteorites, description of new, *J. L. Smith*, 151, 264.
from Hindustan, 302.
Guernsey Co., Ohio, *J. L. Smith*, 87.
Meteorology of Marietta, Ohio, 1860, *S. P. Hildreth*, 252.
Mettenius, Dr. G., Filices Horti Botanici Lipsiensis, 134.
Uber einige Farngattungen, 133.
Microscope, improvements of, *M. C. White*, 110.
Wenham's binocular, 110.
Microscopes, resolving powers of, 12.
Miller, F., November meteors, 1860, 138.
Mineralogy, Dana's, Ninth Supplement, *Geo. J. Brush*, 354.
list of works on, 354.
note on chloritoid from Canada, *T. S. Hunt*, 442.
MINERALS.—
Acmite, 357.
Albite, *Edward H. Twining*, 357.

MINERALS.—
Akanthite, 357.
Alumnite, *Geist* and *Dieck*, 357.
Ammiolite, *F. Field*, 357.
Apatite, *Ransch*, 358.
Bamlite, see *Sillimanite.*
Batrachite, see *Monticellite.*
Beryl, *Hofmeister*, 358.
Brucite, *Ingleström*, 358.
Bucholzite, see *Sillimanite.*
Chloritoid, *T. Sterry Hunt*, 358, 442.
Chrome garnet in Canada, *Hunt*, 295.
Chrysolite, from Vermont, *Edward A. Manice*, 359.
Clinochlore from Achmatowsk, *Struve*, 359.
Copper, argentiferous, from L. Superior, containing mercury, *Hautefeuille*, 359.
Cronstedite, *Damour*, 359.
Darwinite, see *Whitneyite.*
Davyne, see *Nepheline.*
Diallogite, variety, Himbeerspath, from Oberneisen, *E. Hildebrand*, 360.
Dianite from Tamella in Finland, 360.
Epidote, *R. Hermann*, 360.
Faujasite, *A. Knop*, 360.
Feldspar from trachyte of Drachenfels on the Rhine, *Rammelsberg*, 360.
Fergusonite from Ytterby, *Nordenskiöld*, 360.
Fibrolite, see *Sillimanite.*
Fournetite, see *Tetrahedrite.*
Garnet, emerald green, from Oxford, Canada, *T. S. Hunt*, 295, 360.
manganese-alumina-garnet from Minsk, *Lissenko*, 361.
Gersdorffite, *Bergemann*, 361.
Gibbsite, 361.
Gieseckite, 361.
Gmelinite from Cyprus, *Damour*, 361.
Gold, *Genth*, 361.
Graphite from Ajaguss, *Hermann*, 361.
Harmotome from Andreasberg and Strontian, *Rammelsberg*, 361.
Harrisite pseudomorphous of Galena, *Genth*, 362.
Haüyne, *Rammelsberg*, 362.
Heulandite, *Rammelsberg*, 362.
Hjelmite, *Nordenskiöld*, 362.
Hornesite, *Haidinger*, *Hauer*, 363.
Hydromagnesite, *Meyer*, 363.
Kaolin, *A. Knop*, 363.
Keramohalite, *Schweizer*, 363.
Labradorite, *Rammelsberg*, 363.
Lapis-Lazuli phosphorescent when heated, *Bergeron*, 363.
Lead native in basaltic tufa in Moravia, *Reichenbach*, 363.
Leucite, *Bergemann*, 363.
Libethenite, *F. Field*, 363.
Liebenerite, *DesCloizeaux*, 363.
Mascagnine, corrected formula for, 364.
Melaconite, *Kenngott*, 364.
Melanhydrite, *Krantz*, *Rammelsberg*, 364.
Mellite, *J. V. Iljenkow*, 364.
Microcline, *Scheerer*, 364.
Monrolite, see *Sillimanite.*
Monticellite, *Rammelsberg*, 364.
Nacrite, see *Pholerite.*
Natrolite, from Bergen Hill, New Jersey, *Geo. J. Brush*, 365.

MINERALS.—
Nepheline, analysis by *Rammelsberg*, 365.
Ottrelite, see *Chloritoid.*
Paralogite, see *Scapolite.*
Pectolite, *Ingleström*, 365.
Phillipsite, 365.
Pholerite, *R. Müller*, 365.
Phosphochalcite, *F. Field*, 365.
Phyllite, see *Chloritoid.*
Pinitoid, *Knop*, 366.
Pisanite, *Kenngott*, 366.
Polycrase, 366.
Proustite from Chile, *F. Field*, 366.
Pyrargyrite from Chile, *F. Field*, 366.
Pyroxene from Vesuvian lava, *Wedding*, 366.
Rutile, 366.
Sarcolite, *Rammelsberg*, 366.
Scapolite, identical with *paralogite*, 367.
Serpentine and Chrysolite from Sala in Sweden, *C. W. Hultmark*, 367.
Sillimanite, *Damour*, 367.
Silver, a pseudomorph of, after Stephenite, 367.
Sodalite, three varieties, *Rammelsberg*, 367.
Stilpnomelane, *L. J. Ingelström*, 367.
Tagilite, *F. Field*, 368.
Talc, indurated variety from Bristol, Ct., *Brush*, *Lummis*, 368.
Tetradymite, *Rammelsberg* and *Genth*, 368.
Tetrahedrite from Ardillats, France, *Ch. Mène*, 368.
Triplite from Pellau in Silesia, *Bergemann*, 369.
Uranophane, *Websky* and *Grundmann*, 369.
Vermiculite? *Brush*, 369.
Water, density of ice determined by *L. Dufour*, 370.
Whitneyite, *D. Forbes*, 370.
Wöhlerite, 371.
Wolfram, *Genth*, *Pöpplein*, 371.
Xenolite, see *Sillimanite.*
Yttrotantalite, *Nordenskiöld*, 371.
Zinc found in basalt in Australia, 371.
Zincite from Franklin, *W. P. Blake*, 371.
Zoisite, triclinic form demonstrated by *DesCloizeaux*, 371.
Zwieselite but a variety of *triplite*, 371.
Motion of fluids and solids relative to the earth's surface, *W. Ferrel*, 27.
Mountains, heights of Appalachian, 181.
Müller, A., sweet fermentation of milk, 428.

N.

Natural History of the United States, *L. Agassiz*, 295.
New alkaline metal, *Bunsen*, 105.
Newberry, J. S., flowering plants and ferns of Ohio, 130.
Prof. Heer's reply to, on age of Nebraska leaves, 435.
Newcomb, S., vision through colored media, 418.
Newton, H. A., shooting stars, Nov. 1860, 137.
New York geological survey, 125.

Nicklès, J., correspondence of, 266; obituary, 266; insalubrity of the air of Paris, 268; diffusion of germs, researches upon spontaneous generation, 269; chemical synthesis, 270; acclimation, 272; the scrimetre, 273; pseudomorphism and pseudomorphosis, 273; inundations, 275; bibliography, 155, 275.
Nitrogen, proposed process for estimating and acidimetric process, *M. C. Lea*, 189.
Nobert's test plate and striæ of diatoms, *Sullivant* and *Wormley*, 12.

O.

Obituary, 151, 266, 303, 461.
Ocean, motions of, 45.
Optical phenomena of "Silver Spring" in Florida, 1.
Optical studies, Dove's, *O. N. Rood*, 109.
Ordway, J. M., review of Wetherill on the quick process for manufacture of vinegar, 450.
Orthoscopic eye-piece, Tolles, 112.
Osmium, resolution from ore, 64.
Owen, David Dale, obituary of, 153.

P.

Palæontology, contributions of James Hall, 292.
primeval fauna, &c., *James Hall*, 220.
Paris, insalubrity of the air of, 268.
Payer, Jean Baptiste, notice of, 267, 462.
Philadelphia Acad. Nat. Sci. Proceedings for 1860, 308.
Phillips, John, life on the earth, its origin and succession, review, *A. Gray*, 444.
Physics.—
Aurora viewed as an electric discharge, *B. V. Marsh*, 311.
Binocular vision influence upon estimation of distance, *O. N. Rood*, 109.
Chemical physics, 149.
Color of blood-globules, 417.
Declination of magnetic needle influenced by the moon, discussion of observations at Girard College, 1840–1845, *A. D. Bache*, 98.
Declinometer observations at Girard College, 1840 to 1845, in relation to solar diurnal variation and annual inequality, *A. D. Bache*, 197.
Dichroscope, *O. N. Rood*, 107.
Dove's theory of lustre, *O. N. Rood*, 339.
Electric light, *O. N. Rood*, 110.
Fixed lines in spectrum of hyponitric acid, *W. Gibbs*, 415.
Fulgurites or lightning tubes, 302.
Influence of musical sounds on the flame of a jet of coal gas, *C. Sondhauss*, 416.
Light, loss of, by glass shades, 283.
Limit of vision with the microscope, see *Nobert's test plate.*
Meteorites, fall of, in Guernsey county, Ohio, *J. Lawrence Smith*, 87.
Meteorological journal kept at Marietta, Ohio, year 1860, by *S. P. Hildreth*, 252.
Method of producing stereographs by hand, *O. N. Rood*, 71.
Physics.—
Mingling colors produced by absorption or interference, 109.
Motions of fluids and solids relative to the earth's surface, *W. Ferrel*, 27.
Nobert's test plate and striæ of diatoms, *W. S. Sullivant* and *T. G. Wormley*, 12.
Optical phenomena of "Silver Spring" in Marion Co., Florida, *J. LeConte*, 1.
Philosophical apparatus, Ritchie's illustrated catalogue, 304.
Principles of physics, 2d ed., *B. Silliman, Jr.*, 149.
Quasi-vision of moving blood-corpuscles in the retina of the human eye, *L. Reuben*, 325.
Regelation, *W. Gibbs*, 414.
Recherches sur l'équivalent méchanique de la chaleur, *G. A. Hirn*, 155.
Stereoscope applied to distinguish copies from facsimiles, *O. N. Rood*, 110.
Subjective optical phenomena, *O. N. Rood*, 417.
Tolles' orthoscopic eye-piece, 112.
Vision through colored media, *S. Newcomb*, 418.
Wenham's improved binocular microscope, 110.
Picramic acid, formation of, *M. C. Lea*, 188.
Picric acid a test for potash, *M. C. Lea*, 75.
Pictet, F. J., quaternian period, relation to present epoch, 345.
Phosphoric acid in igneous rocks, *James Schiel*, 353.
Planets, new, 463.
Platinum metals, researches on, *W. Gibbs*, 63.
Potsdam formation, tracks in, 17.
Primordial fauna and Point Levi fossils, *J. Hall*, 220.
Primordial fauna and taconic system, *J. Barrande*, 212.
Problems from orthographic projections of descriptive geometry, *S. E. Warren*, 148.
Proceedings of Societies, 156, 308, 443.
Pseudomorphism and pseudomorphosis, 273.

Q.

Quaternian period in relation to the present epoch, *F. J. Pictet*, 345.
